

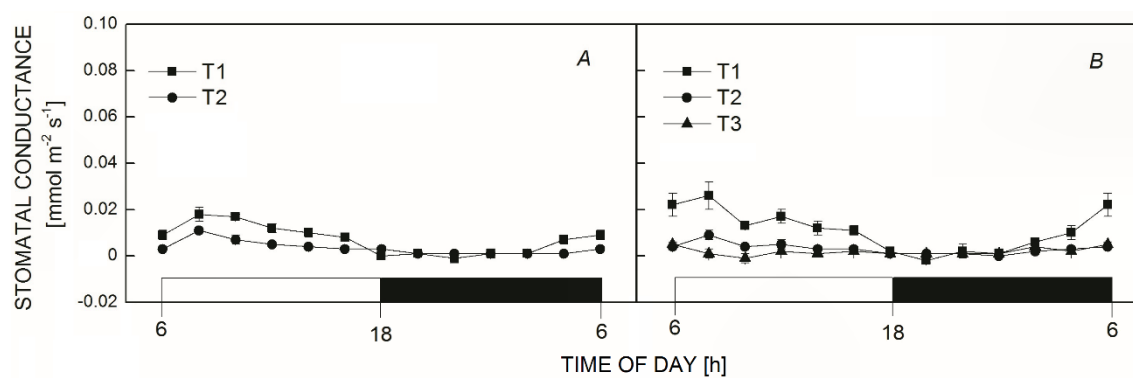

Fig. 2S. Stomatal conductance by *Dendrobium crepidatum* (A) in well-watered conditions (T1) and 28 days without water (T2); and *Dendrobium fimbriatum* (B) in well-watered conditions (T1), 21 days without water (T2), and 28 days without water (T3). The results represent the means where $n = 6$. Open bars represent light periods, closed bars represent dark periods.
